PROJECT'S

- **AIR CANVAS**

Developed an user friendly interface to let people draw the things, write the script they want by using pointer detection without using any physical contact with the system. We have used OpenCV and computer vision techniques using Python with a group of 4 member and I lead the team.

- **BGMI TOURNAMENTS**

Developed a webpage to conduct online tournaments for any kind of events or occasions. I chose BGMI as reference and designed an responsive webpage to get registrations for the tournament. I have used HTML,CSS and JavaScript to complete the webpage with simple and attractive user interface.

- **Portfoio Website**

In this booming and competitive days it is necessary for any individual to design a portfolio. So I have decided to create an attractive portfolio of mine and display all my details at one place. Then I used HTML,CSS and JavaScript and designed my Portfolio in an attractive way so that I could use this as an online resume of mine and able to access easily.

- **REST API USING FLASK**

Developed a portfolio in webstack.

DECLARATION

I here by declare that the information furnished above is true to best of my knowledge.
